

Embedded PDF Fixture

Page one should appear inside the Canvas PDF node.

Vector content

Text and shapes remain sharp at any zoom.

Page geometry

Portrait A4 content tests contain-fit behavior.

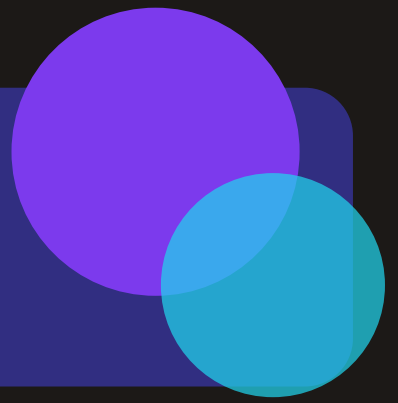

Safe margins

Nothing should touch or cross the node border.

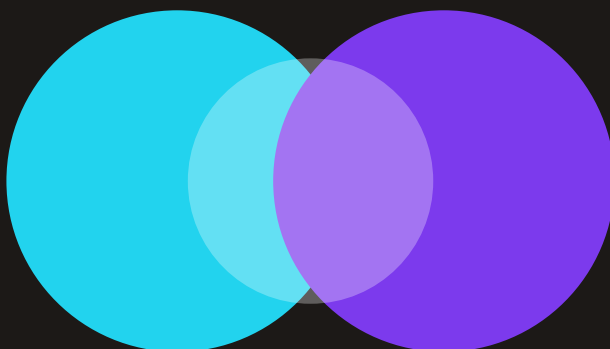

Detail and Contrast

A structured page for raster and print comparisons.

Export quality matrix

HTML	Self-contained	Responsive
PNG	Raster	Transparency
SVG	Vector	Scalable
PDF	Vector	Printable

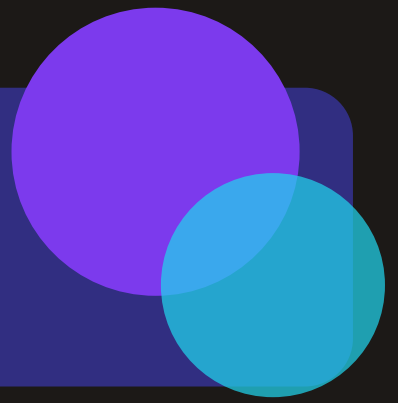

Overlapping vectors

Edges should remain smooth after embedding.

Final Validation Page

Multi-page handling and stable metadata.

Acceptance checks

- The first page is visible in the exported Canvas PDF.
- The source page keeps its original aspect ratio.
- The Canvas node border remains visible around the page.
- Text stays sharp when the exported PDF is enlarged.
- Additional source pages do not create extra Canvas pages.
